September 2025

1. **Attendace policy:** - 2 skipped classes without penalties + 2 missed classes that are made up during the semester
2. **Activity:** 3 Components:
 - *C1*: Python programming
 - *C2*: Search problem and adversarial agents: pacman implementation and test
 - *C3*: Uncertainty: pacman implementation and test

You can work individually or in teams of 2.

3. **Grading::** 1 grade for each *C1*, *C2*, *C3*;
 - *C1*: Test
 - *C2*: Test - it can include running your own pacman implementation
 - *C3*: Test - it can include your pacman implementation

Remark: Each grade for *C1*, *C2*, *C3* needs to be ≥ 5

4. **Deadlines:**

- *C1*: week 5
- *C2*: week 10
- *C3*: week 14

5. **< 5 grades increase:** Only one grade can be increased at the end of the semester (for one of the *C1* or *C2*).

6. **Bonus:** for outstanding activity.

$$Lab\ Final\ grade = \begin{cases} 0.3C1 + 0.4C2 + 0.3C3, & \text{if } C1 \geq 5 \ \& \ C2 \geq 5 \ \& \ C3 \geq 5 \\ \min(C1, C2, C3), & \text{otherwise} \end{cases}$$

Course Final grade:

$$0.4 * Lab + 0.6 * Exam \text{ if } Exam \geq 4$$

.
